

# Learn More about the Latest Levee Improvement Project in the Southport Area!

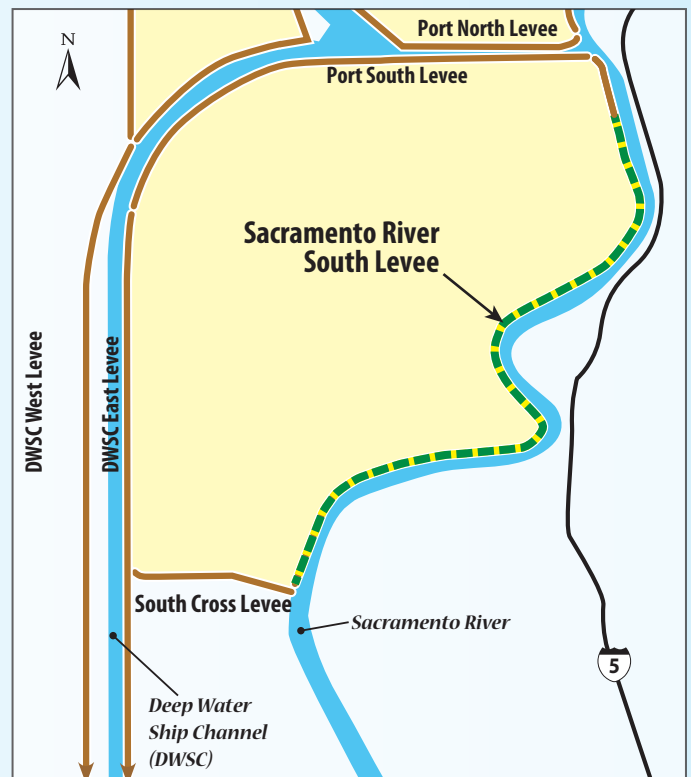

The West Sacramento Area Flood Control Agency (WSAFCA) is proposing the Southport Sacramento River Early Implementation Project (EIP) to implement flood-risk-reduction measures along the Sacramento River South Levee, which protects the Southport community (see map). The project would bring the levee up to Federal and state standards and provide ecosystem restoration and recreation opportunities. An Environmental Impact Statement/Environmental Impact Report (EIS/EIR) is currently underway to determine what effects the project might cause if it was constructed.

WSAFCA and their Federal partner in the EIS/EIR process, the U.S. Army Corps of Engineers, invite you to a scoping meeting to learn about and provide input on the proposed project and the content of the EIS/EIR. Scoping is a process used to inform the public of a proposed activity and provide an opportunity for you to give input on the range of alternatives, environmental effects and any issues of concern. The purposes for scoping are to share information, pose questions and reveal problems early in the environmental studies. Both scoping meetings have the same agenda and topics. A presentation about the project will be given 30 minutes after each meeting begins.

**Date: Thursday, September 15, 2011**

**Time:** First meeting is from **3:30 to 5:30 p.m.**
